

Non-directional pattern — promotes even wear over time

SideArmor sidewall — helps deflect stones and debris

Open shoulder design — along with aggressive lug pattern contributes to traction

Tie bars — reduce lug movement for long, even wear

The Firestone VersaBuilt All Traction radial tire is designed to provide serious traction, dependable performance, and versatility in loader and grader applications.

MAIN FEATURES

- Self-cleaning tread pattern designed to provide traction in soft and muddy surfaces
- Tough proprietary compound for long wear life and cut resistance
- Heavy-duty all-steel radial casing
